

## Inline skating for fun

Inline skating is a popular pastime that can be enjoyed by anyone, regardless of age or gender. As long as you start with the basics and gradually build up your speed and stamina, inline skating will improve your fitness levels tremendously. For anyone who wants a sport or hobby that builds fitness and gives you an adrenaline rush, then inline skating is for you.

For complete beginners it is imperative that you buy inline skates that have a built in stopper, which is usually located at the rear of the skate. This will help you until you learn to stop correctly, which can be a skill in itself – and a very important one! You should also remember to wear the correct safety gear when using your inline skates, especially if you are a beginner. Knee pads and elbow pads are essential to guard against those nasty knocks.

For children, an inline skate that can be adjusted is a sound, economical purchase which will enable you to ensure a snug fit of your kids skates and make the skates last a little longer, giving you value for money. You don't want to have to buy new inline skates every time your child's feet grow, so inline skates that can be adjusted are a sound financial investment.

At Flywalk we have a large selection of inline skates suitable for all ages and all skill levels; all at competitive prices but, more importantly, a high quality which is essential when you take part in inline skating. Inline skating can be very competitive and is great for thrill seekers or speed addicts.

The wonderful thing about inline skating is that it will suit anyone of any age or skill level. Whether you want solitude, fitness, fun with the family or aggression and speed, buying a pair of inline skates will fulfil your wishes.
