

What is the Highest Orangex Ojex Juicer to Buyâ€™s?

The Orangex Ojex Juicer eliminates the twisting reamer in prefer of a level-squeeze mechanism that may be in reality sooner than and easily as surroundings friendly as an electrical juicer.

The Ojex Juicer is produced from enameled cast-iron (for stability) and has five suction cup ft that grip the counter top. It works at the principle of leverage. A strong lever raises the top, revealing an tricky pyramid-design stainless-steel reaming basket with slots to allow juice transfer through.

A comfortable, rubberized grip on the care for is at ease to hold and offers you a slip-unfastened grasp.

To make use of, position a decrease orange on the reamer and pull the lever forward. As you press ahead on the lever, the pinnacle closes and presses the reduce fruit down towards the reamer. Juice is expelled through the reaming basket, and flows down into your able cup.

Because the fruit remains desk bound on the reamer, so much (if no longer all) of the pulp remains hooked as much as the fruit. What you get is pulp-free, seed-free natural juice with [Orangex Ojex Juicer](#).

Comes with an extra fruit attachment for juicing grapes, berries, apple, pineapples and other clean fruit. Stainless steel cup bought separately.

Out there in orange and cobalt, the Ojex Juicer is as simple to wash as it has to use. The stainless steel reamer removes for simple washing within the sink or dishwasher. Its small layout can fit in any kitchen and it can be used to juice oranges, lemons, limes and small grapefruit.
